

Emergency breaks

Emergency break

The resettable EGB Series are call points that can be activated without a power supply during emergencies. They are typically located on fire escape doors. The main function is to override an electrical locking device in case of emergency. A provided key allows the unit to be reset to normal mode.

EGB-100-G, EBG-100-R

Features and benefits

- 12/24 VDC, DPDT switch contacts rated @ 5A/125VAC
