

FPR-1000 Log for use in Stand-Alone System

When using the FPR-1000 in stand-alone mode it is important to log the user IDs of users registered. If you need to de-authorize a fingerprint or card you will need to know the user ID or Card# of the person you are wishing to revoke privileges from. The log below is a sample log to be used for this.

Fingerprint Users (User IDs 3-1000)

User ID	Name
1	RESERVED
2	RESERVED
3	
4	
5
