

CYLINDER

4040XP-3071

Cast Iron Cylinder Assembly

Handing

Non-handed

Sizing

Adjustable spring size 1-6, includes LCN Green Dial

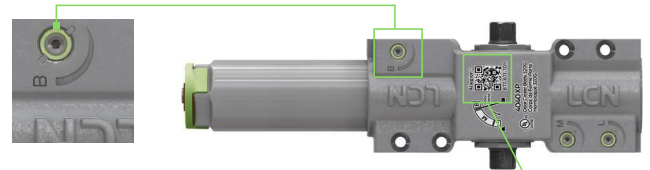

Available Cylinder Options

DEL	Delayed action cylinder
-----	-------------------------

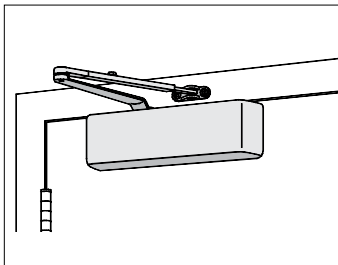

ADJUSTMENTS

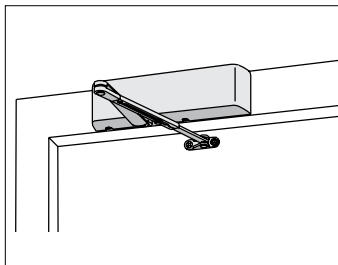

- LCN Green Dial provides a visual reference of the spring power setting, taking the guesswork out of spring power adjustments.
- Additional adjustments can be made to the back check, main, and latch regulation valves which are labeled for easy identification.
 - Note: Labels correspond to a diagram with door swing zones located on the closer body.
- A patented positive stop feature on all regulation valves. The improved staking feature prevents the screw from being backed out and causing accidental damage to the product.
 - The patented regulation valve indicators provide visual color indicators of how far a screw is backed out—the more visible the component, the faster the speed.
 - This makes adjustments simpler and more intuitive.
- QR code that provides on-the-spot access to interactive installation and maintenance instructions and tech support.

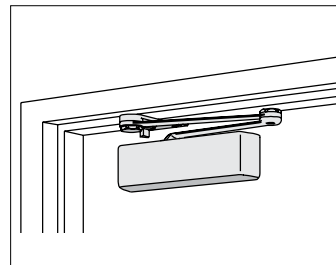

MOUNTING

Hinge (Pull Side)

Top Jamb (Push Side)

Parallel Arm (Push Side)
