

RF-C8500 Cylindrical Style RFID Lock

Maglocks.com is a division of Gravino Group, LLC

RFID Card + Mechanical Override Key

The RF-C8500 Lock has been designed to accept RFID Cards for routine use as well as incorporating a Mechanical Override Key. The RF-C8500 electronic hotel lock from Maglocks.com features leading edge RFID technology with a mortise lock body and built in deadbolt. No exposed card slots on the face of the unit, helps prevent water/dirt from entering the lock unit and causing pre-mature failure. No wear and tear on the read heads, because cards are "**waved**" in-front of the lock (**average 1.5cm range**) they never make contact with a read head which eliminates the possibility of a damaged card breaking in the lock. High Quality Cylindrical Lock Body. High quality intersect finish combines a stunning look with excellent scratch resistant durability. The RF-C8500 is perfect for medium to large hotels. The RFID Card technology gives hotels a high-quality, low maintenance solution that looks and performs great.

RF-C8500 Mortise Style RFID Lock

American Lock Cylinder

RFID Card + Mechanical Key

- Elegant styling with no visible screws on the lock surface.
- Free rotating handle eliminates forced break-in.
- Powered by 4 standard 1.5V AA alkaline batteries.
